

TEACHING ENGLISH IN THE REPUBLIC OF KARAKALPAKSTAN

Nurimbetova Dilnaz Eshmuratovna

32 School Nukus, English teacher

Abstract: In this article we will talk in detail about the meaning and objectives of teaching English and other foreign languages in the Republic of Karakalpakstan.

Keywords: method, express method, traditional, problematic approach, grammatical error.

Introduction

Today, the ability to speak foreign languages is a prerequisite for vocational education becomes one of the components. For specialists in different fields, due to the high level of cooperation with fifty partners, they have a high demand for language learning. Foreign languages in modern society as a profession become an important component of education. Language at different levels: Today, large collections of learning materials are available for those with knowledge. This is the achievement of success in achieving the goal, the practical techniques of teachers and depends on qualifications. From information technology and modern teaching methods, the ability to use will help you quickly understand new materials. By combining different methods, the teacher will be able to solve certain educational programs. At the same time, the use of several teaching and learning methods gives an effective result. Learning takes place in small steps and the learner can access existing knowledge the basis of the system. [3.92]

At the initial stage, considerable attention is paid to pronunciation. The educational process at the beginning, the teacher should focus on the pronunciation of the student. When grammar and vocabulary are basic and the speaker's pronunciation is wrong, it's all useless.

Native speakers pronounce the speaker's words correctly; they can also understand speech with grammatical errors. Therefore, when teaching, the focus is first on pronunciation. This is the essence of native speakers, using their various audios gives a good result. The teacher during the letter lesson should teach how to pronounce the words correctly. Also, the starter at the stage pays great attention to oral speech and the development of reading techniques. At the same time, the issues of teaching a foreign language by types of speech activity are considered in their training, it is necessary to perform the following tasks:

- a) Formation of the reading mechanism;
- b) Develop the technique of oral reading;
- c) Reading comprehension [1.74]

The role of modern technologies in learning and teaching a language is invaluable. The technological use of tools for every aspect of learning a foreign language (reading, writing, listening to understand and speak) is used in I. For example, to understand, listening without a computer, player, CD this process is impossible. Listening comprehension is one of the most important parts of learning a language. In this case, the reader at the moment of the speaker's pronunciation, compliance with grammatical rules, pronunciation of the word, his richness and attention to its meanings

In the process of learning when using modern technology, it is important that students also know well and be able to use information technology is considered. Teaching a foreign language using modern technology and learning is one of the most effective ways. In this process, including: - when using

computers, the reader can watch videos in a foreign language, watch shows, dialogues, as well as films or cartoons. [2.63]

Language learning programs on computers, phones are also available for beginners and lend themselves well to language learning at an intermediate level. Talk (English speaking practice), Daily English, Learn English (English master), How to speak Real English are examples of such. These programs are structured in such a way that reading (reading), listening (listening), testing - all this takes place. Hearing learned new words in your spare time by recording them on a phone recorder is another good way to review.

The science of a foreign language is divided into four aspects (reading, writing, listening comprehension and speaking), for each of which separate concepts and skills are given. Educational technologies are the effective use of modern information technologies in the educational process. [4.18] It also provides for improving the quality and efficiency of education through the introduction of modern innovative technologies into the educational process. In particular, the use of such information and communication technologies in the study of a foreign language has a number of advantages. The role of modern technologies in learning and teaching a language is invaluable. The use of technological tools will come in handy in every aspect of learning a foreign language (reading, writing, listening and speaking). [5.103]

Also with English subtitles, showing films, cartoons is also one of the effective ways of teaching the language is considered. Speech skills in the trainings conducted in the learning process sufficient attention to the formation and development of social flexibility should be given. In addition, the success of each lesson in education largely depends on the proper organization of learning. Teacher and student lesson based on creative cooperation
