Abstract: Proceedings of the farms that should be in this article economic knowledge and its theoretical basis and causing conclusions mentioned.

Keywords: farm, agriculture.

To enter. Farm - self a long-term lease of land to be given using the joint activities of members to be engaged in the production of agricultural goods based on the rights of the legal entities are independent business entities.

The other person may hire farm labor to work on the basis of the contract. Do'jaliging hisoblanishmaydi members hired workers farmers. The head of the household, the age of 18, have reached the farm of the agricultural sector on the relevant qualifications, expertise, work experience, having selected one of the members is capable of dealing. The head of the farm, temporary work, or lost the ability to perform its function for a long time the absence of it the same authority gives one of the household members.

The main part.

Farms works on the basis of the following contracts. Donated contract, loan agreement, loan agreement, contract delivery, buying, selling, contract, contract for the sale of real property.

The terms of the contract are unclear, responsibility, the responsibility of work as a result will not be sufficient. This, of course, in the future, the performance of the contract in brings. The yield is also a similar income also is buck.

The management of the farm is partially different from the management of other types of enterprises. Basic functions of management, principles and methods are same but they are different in different enterprises is used. The difference is the size and activity of the enterprise boshqalarnikiga makes the difference. Out of production and farm complex located to take a chance, reach the requirements, and for this reason, the price of the product and the production process is that the effects of the variability and obhavo. Also, large farms (for example, the company, the farmers cooperative in working for their expert line work on and carry out the management functions they might find complicated.

Head of farm enterprise in the first place implies to define the purpose of the task is fulfilled. The management will not make decisions without purpose. Goals things so using them with an alternative way of using resources and the advantage that can determine which side it is characterized two from the second.

Operating in the field of economic management of the country primarily agricultural economic governance mechanisms based on the mechanism of the formation to make up the head of this household have a business plan that was perfect in order to do initially, employees and managing them to submit jobs without functional tasks given to ensure the participation of targeted enterprises and

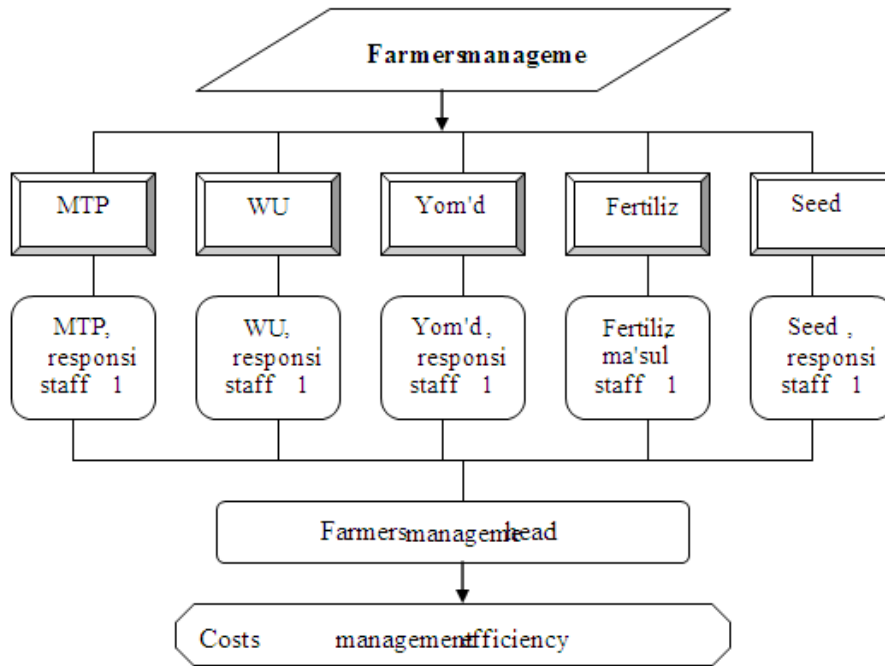

economic relations with the return credit should be established on the basis of the service agreement. Management style economic management (enterprise) and maintain the normal functioning of the summary of a set of targeted measures aimed at creating conditions necessary for the development of make up. Economic mechanism of economic development commercial account-book is based on the use of effective work.

As it is known, the farm property to achieve financial independence and the change of the shape of the enterprise profit distribution fund formation and main to be solved independent of the process requires the implementation of methods of increase of the role of economic management. This, in turn, plans to strengthen the economic results of production liability. In each directory, each in his joints, the development of commercial settlements in the management of the business (management) depending on the degree of development is carried out. Marketing service level to be the product of planning, which requires which type of high demand, established depending on the type of product, pricing, bo'nak goods for credit, leasing, preferential loans and will deliver the information about etc. In turn, the volume of production of the product planning department, prepares its about types of assignments in a few options, thus, be of several different types of crops (in consultation with the agronomist) determine out with the leadership of the council of planting crops that is coming, and the technology of production is defined. The planning department will then determine the demand for all resources.

Financial management modules in economic policy, the importance of investment on this basis defined in the policy. To get this style in your debt (credit)is based on the requirements also. Financial strategy respectively, is acceptable in the form of tax policy, the accounting policy is defined on the sides of its main businesses. All of this event planning, finance, accounting, book-and the experts are responsible to be legal or that are agreed with the same area.

Commercial account-book of the farms out of the product the producers with the former methods, the regulation of relations of economic affairs aimed at doing the job, take advantage of high-effective, extended on the basis of production in farm production ensures that repeated only get to go.

Also the bills in the household of employees in the government, it is desirable to make the reasonable use. That's a direct contract with that on the relationship of economic cooperation on the basis of the enterprises in which the members of the household, depending on their ability on various issues and the appointment of the staff responsible for them over the head of the household should go out of control. At the same time because the head of household in the picture below, and this in turn limited the possibility for listed companies to be engaged to manage costs effectively shows the negative effects. So yukary as we have noted in the mechanism of the organization of management on the basis of economic costs, which offers us the farm boasts a stream orto the head of land management and worthwhile to think (1-picture).

1- Picture. Farm management mechanism in costs [1]

Farms, farm and is one of the advanced forms of doing business. His production activities by the state, a long-term lease granted on the basis of the law is available here performs. The contract was made on the sale of the product with other legal entities independently of their product determines the price, gets paid income tax of the other person will use the funds on the basis of the contract of the estate and debt. [2] such advantage of running a farm, owners, business, civil servants is also one person in the image. Interested in the results of production and therefore responsibility for, and will dramatically increase.

Farmers in the production of self-management and control, that is, complete and task management is in the hands of a person. Active within the capabilities of this case show a simple peasant way to be creative and perform more complete is wide open.

Management is directly associated with the production process, the production of opportunities for the effective use of internal resources on identifying the important issues of the lobby. Business plan for the farm's production and commercial activities-mission the fulfillment of the condition of effective use of production resources, and managing them is one of the important directions of targeted options are determined.

While the economic management on the organization and its management is managing skills is the person who in all respects is related to.

Shows the location of each component in managing the overall process. Farm business management farm management process diagram produced in the form of if is useful in the development of the business. [3]

Agricultural enterprises of management methods in economic, organizational, managerial, social, spiritual, legal in the style appears. The calculations are valid in the method is that the economic, organizational and administrative management in the method arise in the method of the process of administration the division of labour, social and lifestyle requirements in a way that human culture is incarnate, and spiritual experiences as well as the legal relationship management support method is the

basis of a person. Effective management of the enterprise shall be assessed and the results are often formed the system management goals.

Almost the goal of management to reduce costs, get maximum benefit, seeks to the maximum satisfaction of the needs of. Determining the goals of planning in agricultural management in the initial activity. The interaction of this decision-related reason, because they are not seen as separate. The factors that influence this decision, which has many features of market, business management and agronomik are required.

Given the presence of strong competition in a market economy, bozorbop of the manufactured products, should ensure that will be in high demand. If a product is in high demand, or market place development to the applicant information on the trade will go. Often this information may not be accurate, so if you need go to the farmers market itself will determine the information. This process is called the study of the market. Agricultural management to work out what it is, how to produce, how to work out also studied the dependence of the factor market to issue out. To these issues as well as the requirements of the market, it also shows the effect of management requirements.

Centralized agricultural production in the conditions of market conditions, the head is radically different from agrotizm from the manager. Talabehtiyoj their forces towards the market economy, the impact of the enlargement of the effects of it will show. Looking forward to spending the main power of farmers and agricultural producers, consumers respond to the request antichrist comes on quickly. Tashabbuskorlar need to work out what to farmers and the state does not force. This means that "new" leaders will be forced to accept many of the managers of agricultural enterprises independently of the solution. Managers are the subject of reports to the head of the largest economy in large, despite the fact that given the large demand of them, along with this commitment is also great. They take off to put issues to functional expansion to the business plan, to add to check your answer.

Agricultural business management skills adopters private farmers is found before it comes on. Farming enterprises should work as just "life image" despite the fact remain is only the mechanism of modern production manager or you need to get acquainted with the farmers.

In agriculture and business activity of subjects of property rights and their activity is determined depending on the characteristics of tijoratchi directory. According to the general rules, and institutions to get profit distribution between the main aim of the organization consists tijoratchi.

The establishment and development of the implementation of economic reforms in agriculture farms, umladan, which is based on private ownership of the economy and its main element in the formation ko'pukladli agricultural enterprises to build the foundation for the occurrence of economic and market requirements to be compatible siftida recognized.

Forms of doing business is one of the advanced economic and farm. His production activities by the state long - term lease is available here given on the basis of the law performs. The contract was made on the sale of the product with other legal entities independently of their product defines the price, gets paid income tax of the other person will use the funds on the basis of the contract of the estate and debt. Thus, the advantage of running the farm, one person is in the image owners. Interested in the results of production and therefore responsibility for, and will dramatically increase.

Conclusion. Farmers in the production of self-management and control, that is, complete and task management is in the hands of a person. This weakness be creative and perform complete active within the capabilities of a simple peasant shows the way to wide open. Farmers more than the head of the organizers enthusiast and entrepreneur. It will settle on the farm arising smehnat yaizolarini with determination. Here also the relationship to the labor legislation also based on moral norms. Principle

based I can say that is easy to solve the problems in farm production in market conditions, live, going to get himself and the real opportunities will be more able to reflect o'nglab stability.

Therefore in the next years the state program of development at the level of farms in the country is carried out. Including scientifically analyzed the development of small business and business, and the legal basis, at this time financially support small business and business, the latter is amended and the rules for this branch of national legislation are added. The widespread introduction of new pedagogical technologies in teaching students of higher educational institutions and the effective use of innovative technologies are the main support for improving the quality of education.
